Mrs Ricci/Mrs Janine Cooper on 01535 645206

All our staff are locally based giving us more

“Time to Care”

Say you read it in the Worth Valley Mag

**BUSINESS OWNERS:
SEARCHING FOR SOMETHING?
... WELL, YOU'VE PROBABLY ALREADY
GOT IT!!**

I'LL say the scary word first...**SOFTWARE** ... and now that's out of the way, it can only get better, so please read on!

You may (like most of us in Business) be struggling to do the real work, usually earning money and working with your products, and then keep up with the admin side, usually in your spare time. The fact is, none of us have free, or spare, time – if we choose to spend our leisure time on our work, it is still a cost to the Business. After all, you could use that time to develop your marketing or products etc. instead of the Admin. However, without good, basic and up to date info about your business progress, then you have nothing to build or develop from - the 'Chicken or the Egg' scenario.

The fact is, you will probably have already invested your IT budget on the best system you could afford, so you are literally at the limit. You will have so many ways of doing things and options, that you will have found a way of doing the basics i.e. Invoicing the Customer, and stopped exploring after making this major and most important breakthrough.

Even where you had initial training on the system by the supplier, it was probably generic and not really related to your business, and more importantly ... if you don't know what to expect or what is possible, then how do you know to look for it?

Even if you had software written for you, you will not be surprised to hear that 70% of software (including bespoke) written is never used!

That's where we at ark-IT-tech come in... we are Business Consultants, and will work with you and your team to improve and automate more of your business processes. Improvements can always be made, even if it's just changing habits, by looking at things from a different perspective. The partners who are ark-IT-tech have no income from Software or Hardware providers, and we therefore have no interest in selling gadgets, so you can be sure we will not encourage you to add to the Desktop clutter.

“70% of software written is never used.”

We have spent a combined 60+ years implementing software and IT solutions for Businesses, so we have heard all the excuses and pro's & con's in the IT world. Money has never been more key to a business, and we offer a way for you to make improvements without having to purchase anything... OK, you will need to pay for our time, but at least that doesn't attract a licence, subscription or support contract!

Contact Helene or Paul Heyes of ark-IT-tech, for a FREE initial discussion regarding how we can work together on
